

## SECURITY

---

The studio is fitted with an alarm system. We feel reasonably confident that equipment can be safely left on the premises, but we must emphasize that this is at the owner's risk.

## TO SEE THE STUDIO

---

If you would like to see the studio for yourself and listen to some of the recordings - that would be great. Please call for an appointment and we will accommodate.

## AUDIO RECORDING

---

*Our goal is to provide you with the highest quality recording for the time, talent and money invested.*

Professional high definition digital recording, mixing, mastering, music editing, CD production, video and DVD production.

Mike's Studio is a custom built recording facility designed to meet the needs of musicians and singers of every style.

Here at Mike's Studio we are musicians ourselves, so we know how to give your production the tender loving care that it deserves.

We can accommodate full band set ups or single singers.

We have a large stage area with an isolated drum room. The stage is fully equipped with amps, instruments, speakers, microphones and stage lights. Dim: 14' x 17'

There is also a lounge area for an audience to watch as you record or for musicians to relax during breaks. In the lounge there is a mounted flat screen LCD TV and video camera. Dim: 14' x 15'

The sound/ control room is isolated as well as sound proof from the stage. A 32 channel snake brings your signal from the stage. The control room is equipped with a 32 track live mixer as well as a 24 track digital recorder (Roland Vs2400Cd studio)

## METHODS OF RECORDING

**Track/Multi track:** This method is used for full bands, all digital separate tracks. (Highest quality)

**Live:** This method is for a full band, 32 live tracks mixed to 4 digital tracks plus vocals. This allows the band to play and record together.

**Sing-a-long:** Vocals or instrument tracks recorded with imported accompaniment.

## IN HOUSE INSTRUMENTS

Pearl Drum Set                      Guitars and Bass

Casio keyboard      Yamaha Electric drum kit

## AMPLIFIERS

Marshall JCM 2000 half stack  
Crate GX 65 and Crate all tube club 50  
Roland Acoustic AC60  
Ampeg BA-115 and Ampeg 6x8 cab

## EQUIPMENT

We are well equipped with Pro Gear including equalizers and effects (Ana/dig) 5450 watts of power to the stage pushing two 18" subwoofers, two 15" and four 12" mains, two 12" floor monitors. The drum room has a 450 watt powered monitor.

## HOURS OF OPERATION

The studio does not have set opening and closing times. There are no restrictions imposed on our operating times so sessions are arranged to start and finish at times which suit the Client – day or night (although we do like to sleep sometimes!).

## PACKAGES

There are a number of packages available and can be custom fit to your needs. Contact us for a quote of what you would like.

## REHEARSAL

The studio is available to rent for rehearsal time, where you can practice with the pro gear and lights. You can also bring your friends and put on a small private show.

## PAYMENT

Payment can be made by cash or cashiers check. Payment should be made on completion of the session, all CD's and media remain the property of Mike's Studio until payment is received.
